The Miracle Paint MDC-2-C Challenger counter model is engineered for industrial use yet is quiet and versatile enough to be used in a laboratory. The single axis rocking motion provides a thorough and efficient mix for two containers simultaneously at the most economical price.

A great variety of container shapes and sizes fit safely and securely into this counter mounted mixer. The dual arm, front loading MDC-2-C Challenger, vertically clamps pints, quarts, and gallons without using adaptors. If you prefer horizontal clamping, our optional side clamp is the solution.

The unit comes standard with a 30 minute mechanical timer and the power cord plugs into any standard wall outlet for maximum flexibility. Counter models need to be secured to a solid surface or used with optional Stabilizer Cups.

All Miracle Paint shakers are quality built, and will deliver years of dependable service. A full one year parts and labor warranty comes standard.
