..... Dimensions					
Width 31.5"	Depth 17"	Height 17"	Weight 130 Lb.	Notes: Timer settings 1.5, 3 and 6 Min	

The Pacer Dual PB double arm mixer is the preferred automotive unit and is the easiest machine to operate in the Pacer line allowing you to mix two containers at a time. The multisize clamping action provides a secure holding system for containers of many shapes and sizes and the push button timer provides three preset mix times up to six minutes.

The high speed, bi-axial motion creates a shear that ensures a complete mix. Colors and accents are quickly and evenly distributed throughout the container. The Pacer's heavy duty design allows for the mixing of industrial weight coatings, adhesives, inks and more. The unit plugs into any standard wall outlet and can be easily moved between areas and mounted on either a floor stand or counter stand depending upon your preference.

The Pacer is available in a full range of drives and timers and the Safety Enclosure options available provide for maximum operator safety. A full one year parts and labor warranty comes standard.
