

PACER AIR

Mixing Arms		Timer	Motor	Drive	Optional Accessories
Single		None	Air	8 CFM at 100 PSI	
Dimensions					
Width 23.5"	Depth 17"	Height 17"	Weight 120 Lb.	Notes: Pictured regulator included.	

The Pacer Air single arm mixer allows you to mix one container at a time when compressed air is available and preferred over electric (to mix two containers simultaneously, see the Pacer Dual models). The multi-size clamping action provides a secure holding system for containers of many shapes and sizes.

The high speed, bi-axial motion creates a shear that ensures a complete mix. Colors and accents are quickly and evenly distributed throughout the container. The Pacer's heavy duty design allows for the mixing of industrial weight coatings, adhesives, inks and more. The air driven unit requires airflow of 8 CFM at 100 PSI to operate the mixer and does not utilize a timer for mixing.

The Pacer is available in a full range of drives and timers and the Safety Enclosure options available provide for maximum operator safety. A full one year parts and labor warranty comes standard.
